Dedicated application compendium for water and wastewater applications

OPTISONIC 6300 P

Ultrasonic clamp-on flowmeter for temporary flow measurement of liquids

- Portable, battery-powered meter, for on-site verification of process flows or inline meters at any location
- -40...+120°C/+248°F
- For pipes DN15...1500 / 1/2...60"
- With data logger and USB interface for data transfer

OPTISONIC 6300 P

TIDALFLUX 2300

Electromagnetic flowmeter for applications with partially filled pipes

- With integrated capacitive level measurement for flow measurement of water and wastewater ($\geq 10\%$ pipe filling level)
- Accurate ($\pm 1\%$) and cost-saving alternative to open channel systems
- Flange: DN200...1600 / 8...64"
- 3 x 4...20 mA, pulse, HART®, Modbus, PROFINET

TIDALFLUX 2300 F

WATERFLUX 3070

Electromagnetic water meter for district metering of potable water and custody transfer measurement

- Battery- or mains powered, with battery backup option (incl. Modbus)
- Integrated temperature and pressure measurement for leak monitoring
- CT: MI-001, OIML R49 up to DN600 / 24", no inlet/outlet runs needed
- Burial installation possible (IP68)

WATERFLUX 3070

KROHNE Group

Global Industry Division Water & Wastewater – KROHNE Academy online

- KROHNE Academy online gives you direct access to the knowledge and vast experience of one of the leading suppliers in industrial process measurement
- Benefits
 - Product independent and commercial-free learning material
 - A clear structure to the learning units: measurement principles, sizing, advantages and limits of operation, applications and industries
 - Free and unlimited use of the platform and of all available courses
 - Available in up to 4 languages: DE, EN, FR, CN
 - Independent of time and place, repetition of courses, individualized learning speed
 - Current learning progress and attainment of a certificate

KROHNE Academy **online**
