OMAN: SUSTAINABLE FUTURE

#OmanSustainableFuture

Oman's Participation in COP28

The Sultanate of Oman is actively engaging in COP28, with an official delegation directed to represent it at this crucial international event. The delegation, which includes representatives from both government and private sectors, will exhibit Oman's noteworthy national projects aimed at reducing carbon emissions and advancing green initiatives.

Apart from the pavilion showcase, Oman plans to actively participate in daily panel discussions, aligning with the conference's themes. These sessions aim to explore specific summit implementations, spotlighting Oman's projects and accomplishments while encouraging specialised dialogues with field experts. This involvement highlights Oman's firm commitment to combating climate change through practical initiatives and collaborative conversations.

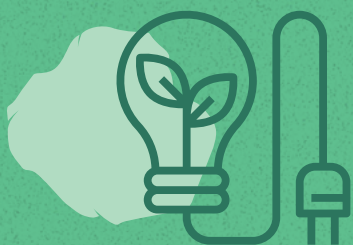

About the Participation

The Sultanate of Oman will be represented by a group of relevant entities in a pavilion at the climate summit. The pavilion will showcase content that explains the efforts and projects undertaken in the green sector. Oman will also actively participate during the event, holding specialised dialogues with experts in the field, coinciding with other summits taking place.

Additional Details

- ◐ A dedicated pavilion showcasing Oman's efforts and initiatives in the green transformation.
- ◐ Workshops, discussions, and dialogues in a designated area within the pavilion.
- ◐ A specialised negotiating team.

Oman's Pavilion

Oman's pavilion at COP28 promises a unique journey for visitors, starting with an overview of the country's abundant natural environment and ecological resources. Attendees are led through various stations showcasing advanced scientific research, sustainable products, Oman's distinctive artistic rocks containing minerals used in clean energy, sustainable city projects, and concluding with green hydrogen initiatives. The pavilion also highlights Oman's experience in climate adaptation through the "Oman Ready" system.
