NW City Water Supplies

- Seattle's Protected Drinking Water
 - Cedar River Watershed
 - 66% of water supply; up to 180 MGD
 - 90,546 acres (141 square miles)
 - only 22% of water used for drinking water
 - Tolt River Watershed
 - 30% of water supply; up to 120 MGD
 - 12,500 acres
 - Remainder of Water from Groundwater
- Other NW Cities Water
 - Everett- Sultan River Watershed
 - Tacoma- Green River Watershed
 - Portland, OR- Bull Run Watershed

Seattle Water History

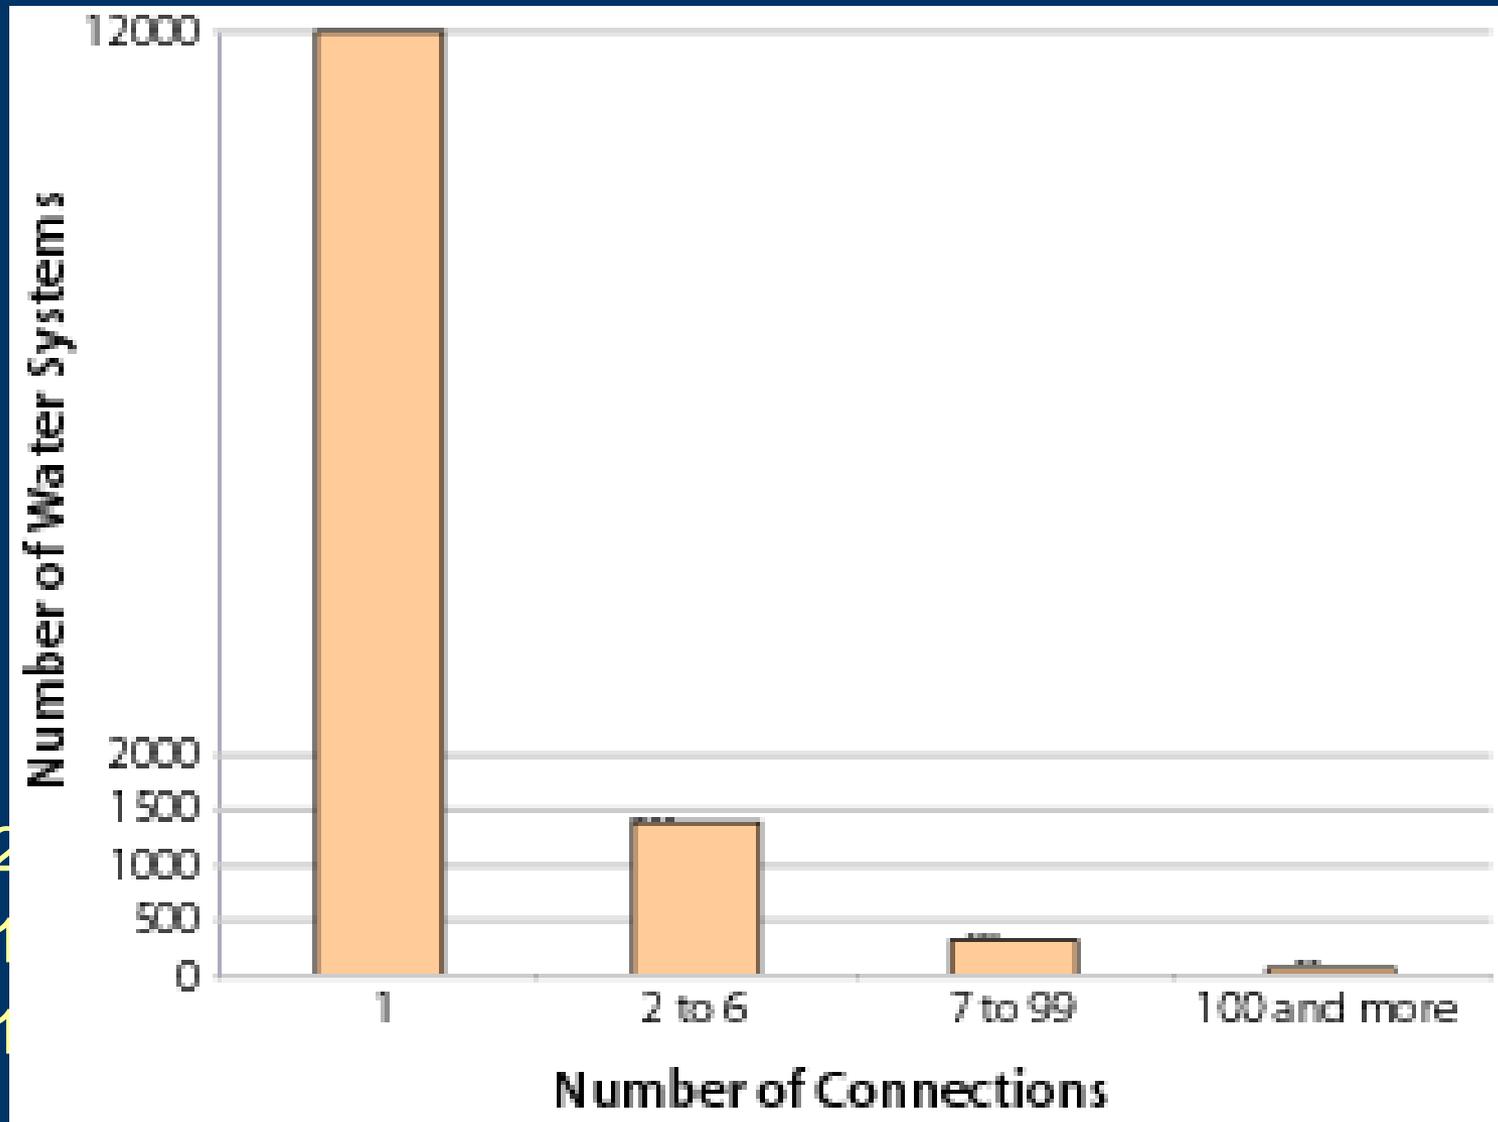

- 1854-1890 Water provided by wells, springs, and private companies
- 1889 City held election to decide if city should own its own water system
- Prior to election the Great fire of Seattle
 - Burned 64 acre business district due to lack of water
- 1890 Seattle bought two private companies
 - Spring Hill Water Company and Union Water Company
- 1895 Seattle voted to construct Cedar River water system
 - Water first flowed into Seattle January 10th 1901
 - Water diverted by dam at Landsburg
 - Channeled into pipeline (28.57 miles) to Volunteer Park and Lincoln reservoirs
 - 23.5 MGD
- Second pipeline in 1909
 - 45 MGD additional
- 1915 Masonry Dam constructed and Floods Mocton
- 1964 South Fork of Tolt brought online to serve North Seattle and Eastside
- 1987 Highline Well Field began Operation
- 2001 New Tolt River Facility completed
- 2004 New Cedar River Facility completed

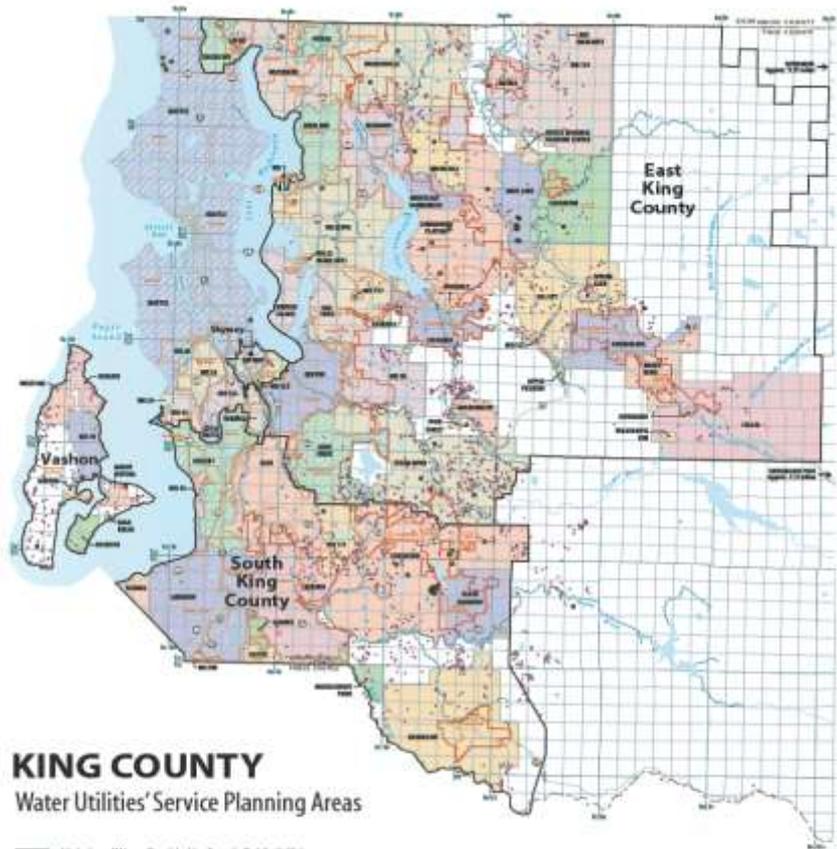

at Cedar (Morse) Lake in 1912.

King County Drinking Water

KING COUNTY
Water Utilities' Service Planning Areas

- Majority of Water Provided by Seattle Public Utilities
- Water Utility Name
- City Name
- Group B Water Systems
- Group A Water Systems with Fewer than 100 Connections
- Irrigation Wells, 2001-2005
- Salmon-bearing Rivers/Streams
- Coordinated Water Supply Planning Area
- Urban Growth Area Boundary
- City Boundary
- Section - Township - Range Grid

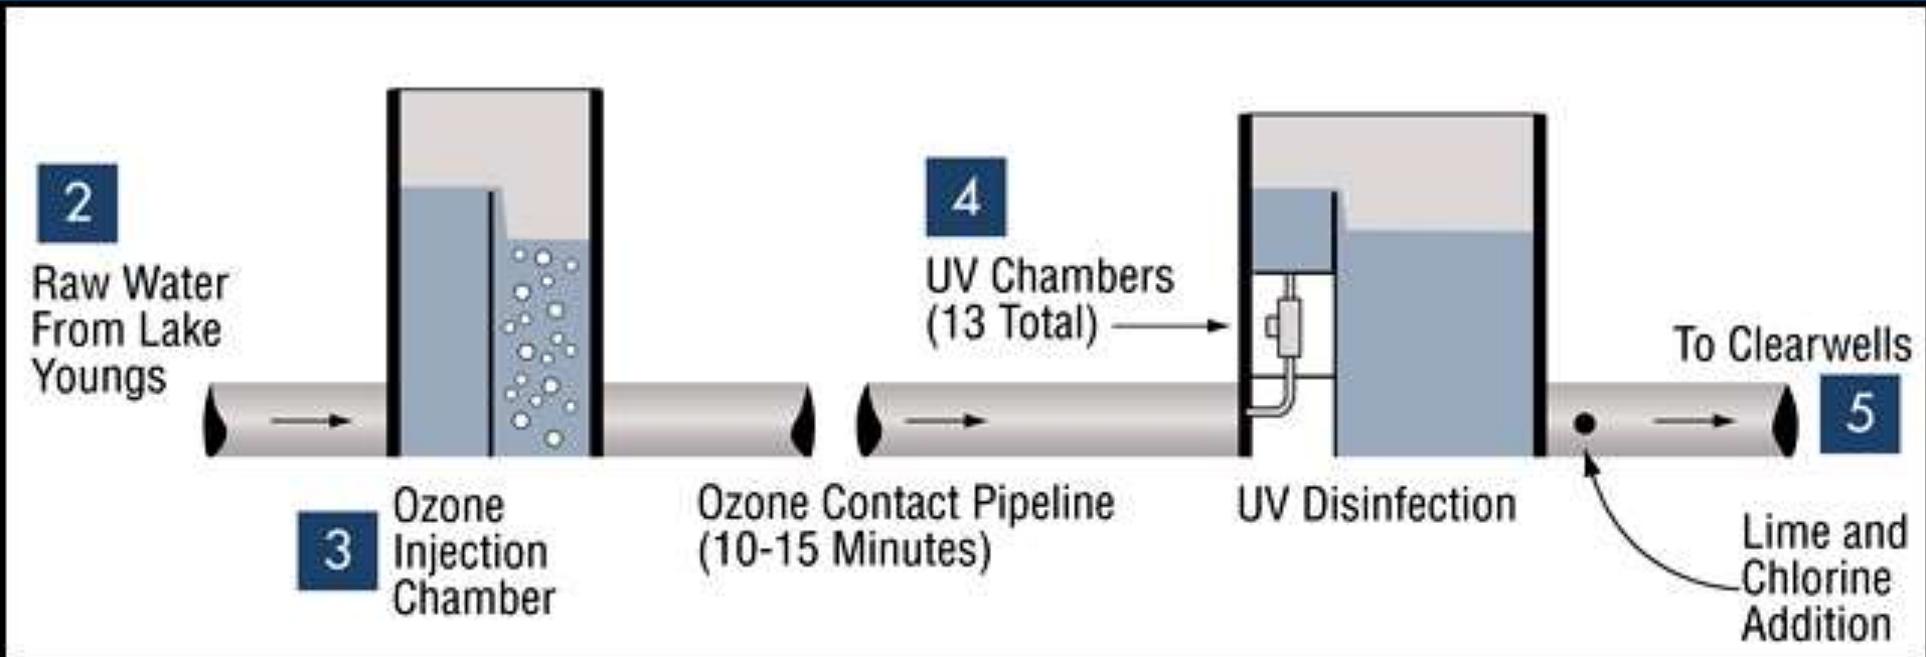

- 39 Water and Sewer Districts

SPU water

- The Cedar River watershed, a 90,546-acre protected watershed that provides almost 70 percent of the area's drinking water.
- 177, 928 metered service lines and 18,000 fire hydrants.
- 2,500 fire protection service lines.
- 1,670 miles of distribution water mains.
- 176 miles of water transmission pipelines (average pipe size is 66 inches diameter; largest pipe size is 90 inches diameter).
- 29 supply and distribution pumping stations with 96 individual pumping units.
- 16 reservoirs, totaling 489 million gallons of storage.
- 16 elevated tanks and standpipes, totaling 16 million gallons of storage.
- 4 dams, including 2 headwork facilities.

Cedar River Treatment Chain

Tolt River Treatment Chain

- Ozonation, Filtration, Fluoridation, pH and Alkalinity Control (Lime), Chlorination

Seattle Waste Treatment

- 1922 Seattle- 30 raw sewage outfalls into Lake Washington
- 1963 Seattle- Diversion of sewage from Lake Washington to Puget Sound began
- Seattle's Waste Treatment Facilities
 - 420 square mile service area; serving 1.4 million people in King, South Snohomish, and Northern Pierce Counties
 - Westpoint Treatment Plant (1966)
 - 119.3 MGD average
 - South Treatment Plant (1965)
 - 81.3 MGD average
 - Vashon Treatment Plant
 - 0.124 MGD average
 - Brightwater Project (North Facility) (2010)
 - Carnation Facility (2007)

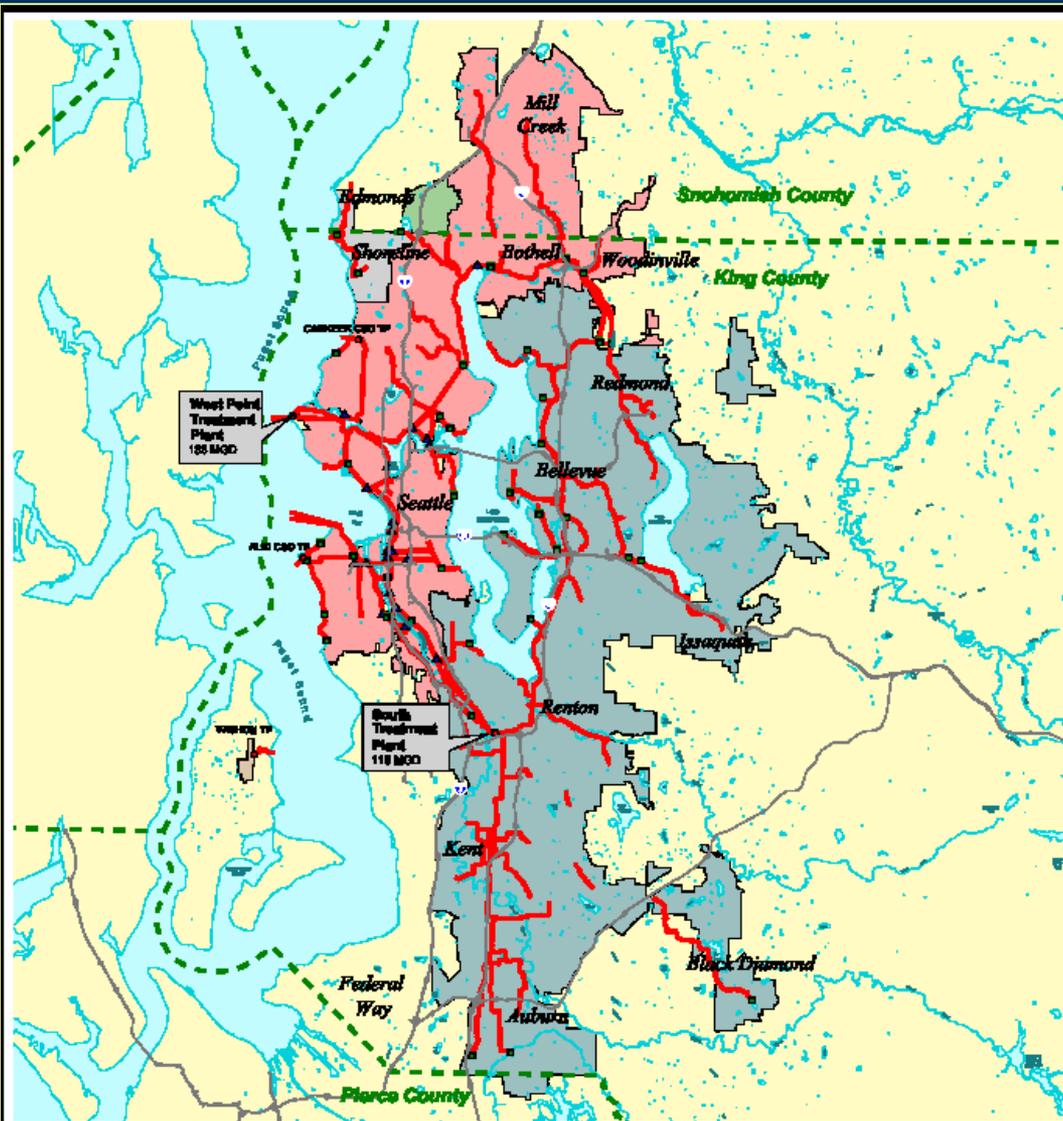

Westpoint

South

No site identified at this time for roads treatment plant, conveyance, or outfall

King County Wastewater Treatment Service Area and Facilities

- King County Owned Treatment Plants
- Pump Stations
- ▲ Regulator Stations
- ▲ King County Conveyance Lines
- ▲ County Lines
- Water Features
- KG WTD Service Area
- West Service Area
- East Service Area
- Yashon Service Area
- Edmonds Service Area - Treated by KC
- KG Service Area - Treated by Edmonds

SPU drainage and wastewater

- 90,000 inlets.
- 51,000 maintenance holes.
- 45,396 catch basins.
- 1,491 miles of combined sewer and sanitary pipelines (average sewer pipe size is 8 inches diameter; largest pipe size is 210 inches diameter).
- 150 miles of ditches and culverts.
- 68 pump stations.
- 450 miles of storm sewer pipelines (average storm sewer pipe size is between 12 inches and 24 inches diameter; largest pipe is 180 inches diameter).
- 38 combined sewer overflow systems.

Remaining Problems with Seattle Water/Wastewater

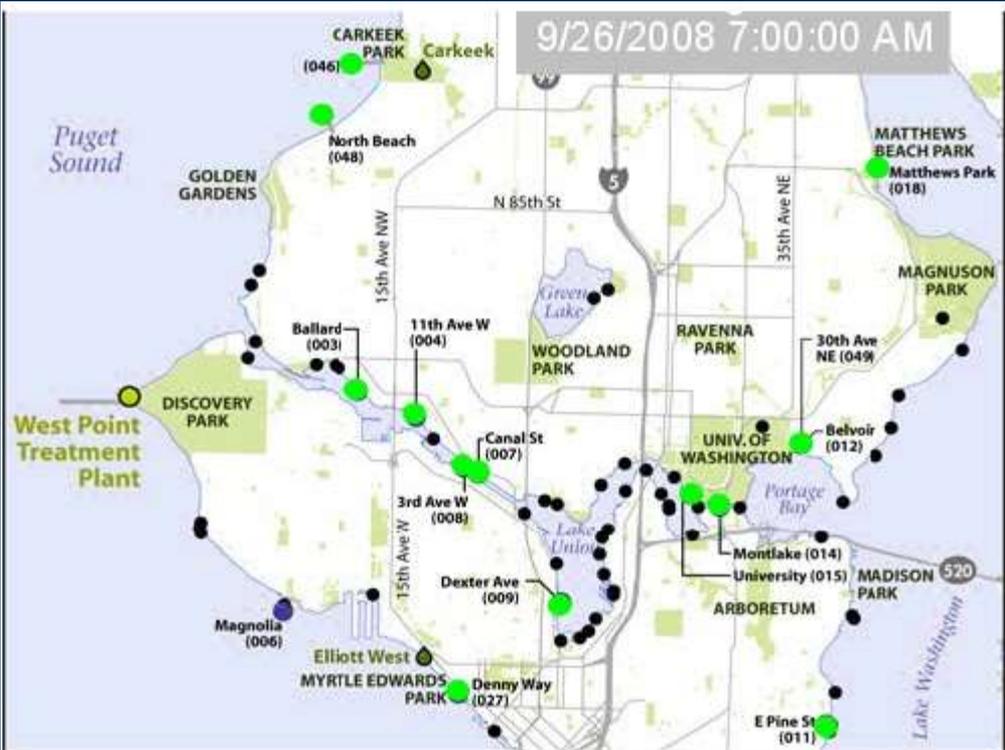

- Combined Sewer Overflows
- Uncovered Storage Reservoirs
- Capacity
- Distribution System

WARNING

**Possible Sewage Overflows
